

## PROJECT PROFILE

# LOFTIN EQUIPMENT

**PRODUCTS INSTALLED:** QUIKSHIELD® 1000 Roof Primer  
 QUIKSHIELD® 155 Roof Spray Foam  
 QUIKSHIELD® 1929F Acrylic Coating with Granules

LGE Design Build chose to have a spray foam roofing system applied to the new Loftin Equipment building in Phoenix, AZ specifying a 1" foam cover applied to the plywood substrate with CMU walls. The contractor had also selected a 10 year warranty of the roof system.

**Installer**  
Arizona Foam & Spray

## PROJECT FEATURES

Phoenix, Arizona

New Construction: Commercial

Spray Foam Roofing System

21,648 sq.ft.

## PROJECT CHALLENGES

This building required coverage on two decks one with a screen wall, Our applicators worked efficiently on the project due to the minimal congestion allowing them to get the work done quicker than anticipated.

## BENEFITS OF SPRAY FOAM ROOFING

Spray foam roofing systems provide low maintenance costs, a longer service life, and a reduction in energy bills. Unlike traditional roofing solutions, a spray foam roofing system forms a seamless, monolithic barrier that reduces escaping heat, thereby providing significant utility cost savings. Spray foam roofing is also a great solution to many existing roof issues, in most cases it can be installed directly over your existing roof without its removal.
