

QUIK-SHIELD®

# HYDRA XC

**BUILT FOR THE  
DAYS OTHERS  
CAN'T SPRAY.**

**Sprays reliably down to 0°F**

**No seasonal changeover**

## Overview

There has never been a winter foam like **HYDRA XC**.

This next-generation HFO system sprays reliably from 0°F to 100°F, eliminating seasonal changeovers and lost work days.

Where traditional closed-cell systems force shutdowns, **Hydra XC** maintains stable rise, dependable adhesion, and predictable control across extreme temperature swings – keeping crews productive when others can't spray.

More install days. More jobs completed. More revenue earned.

This isn't just a seasonal foam – it's a schedule stabilizer.

Spray foam technology continues to evolve as formulation tools improve. New additive chemistry now allows performance that earlier HFO systems simply could not achieve – including reliable freezing-temperature application.

Older systems forced contractors to wait for weather windows.

**Hydra XC** removes those limitations.

Staying competitive today means offering modern formulations – not outdated technology

## What Makes Hydra XC Different

### Cold-Weather Capability

Spray down to 0°F ambient conditions..

### Wide Temperature Window

Usable up to 100°F without switching products.

### Next-Generation Spray Profile

Stable rise and adhesion in extreme conditions.

### Inventory Confidence

No seasonal product swaps or stranded winter material.

### Competitive Advantage

Work when others can't..

## Performance Highlights

Property	Specification
Formulation	Closed-Cell, High Yield, HFO
Seasonality	Extreme Cold to Warm Conditions
R-Value	7.5 at 1"
Nominal Density	2.0pcf
Average Boardfeet	4800
Temperature Settings	Summer 90–105°F Winter 110–135°F
Adhesion	3–4 seconds
Max Lift	3" or (2"+2")

## The Hydra XC Advantage

Hydra XC extends the spray season contractors once had to pause for. Engineered for extreme conditions, it maintains stable rise, reliable adhesion, and predictable control from freezing mornings to warmer afternoons – without switching products.

**Hydra XC** keeps crews working when temperatures shut other systems down. More spray days, steadier schedules, and more opportunities to finish jobs others have to delay.

## Why Contractors Choose SWD

### Consistent Quality, Every Time

SWD products are manufactured and tested in-house to the highest standards, so our contractors know exactly what to expect on every job – reliable foam, consistent yield, and dependable results.

### Real Support from Real People

The SWD team is always within reach. Contractors trust us because when they call, they reach someone who knows the products, understands the work, and is ready to help.

### Smarter Account Management

Our online customer portal gives contractors full control of their accounts – 24/7. They submit and pay for orders, track shipments in real time, and access full order history anytime they need it.

### Five Decades of Experience

SWD has been leading the spray foam industry since 1972, and that experience shows in how we serve and support our customers. Our longterm partners know we're in it for the long haul.

### Focused on Spray Foam. Always.

Every part of SWD is built around one mission – to make spray foam the standard in building performance. When you partner with SWD, you're not just choosing a supplier – you're investing in the future of spray foam and your place in it.
